Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 drawn to image storing process, classified in class 382 subclass 305.
 - II. Claims 5-10 drawn to image display process, classified in class 382, subclass 214.
 - III. Claims 11-17 drawn to image judging process, classified in class 382, subclass 307.
 - IV. Claims 18-25 drawn to image printing process, classified in class 358, subclass 1.1.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the claimed invention I has separate utility such as image storing process, and this utility is not needed by invention II which is image display process, invention III which is image judging process and invention IV is image printing process. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
